

Dear Client,

A Purchase examination is a thorough physical examination stating an opinion of the horse on the day of the exam. The guideline we follow in doing the examination are current with the standards set by the veterinary profession.

The exam is performed for the buyer and not the seller. It is the buyer's responsibility to inform the veterinarian of the intended use of the horse and what past history they know. The buyer must also inform us of what radiographs, blood work (CBC, profile, Coggins, drug testing), or diagnostics (endoscopy, reproductive work-up, etc.) are to be done. Purchase examination fees can be expensive, and it is the buyer's option to decide what is to be done on a particular case. If a professional is acting as an agent for the buyer, he or she should be aware of what diagnostics are to be done.

When doing a purchase examination, we are asked to give an opinion as to whether a horse has any indications of problems. We cannot predict the future of any horse. We try to give the best opinion possible from examining the horse on that particular day. Horses are like people in that they have different pain tolerances. Therefore, it is impossible to be positive on any day that no sub-clinical problem exists. It should be understood that the veterinarian does not issue a warranty on any particular case, and if one is desired, this should be contracted with the seller

The horse will not receive a "pass" or "fail." The decision to buy can only be made by the buyer. It is not our job to state talent, suitability, disposition, or value. Only the buyer is able to decide if these parameters meet his/her satisfaction.

Please discuss any questions regarding the exam with us before you pay for the horse. Radiographs are a legal part of a medical record and are the property of the veterinarian. They are only mailed to the veterinarian requesting them and only after the bill has been settled.

Sincerely,

_____, D.V.M. Date: _____

BUYER'S COSTS 2017

*The items below will be performed at the pre-purchase examination.
Prices are subject to change.*

Call Charge – (If applicable).

Pre-purchase Clinical & Moving Examination: \$345

The clinical examination begins with a comprehensive evaluation of the horse's respiratory, cardiovascular, musculoskeletal and gastrointestinal systems. During the moving evaluation, the horse will be examined at a walk and trot on a firm surface, and lunged at the walk, trot and canter in both directions on a lunge line. A neurological exam will also be performed. In addition, flexions of the forelimbs and hind limbs will be evaluated. Under the direction of the veterinarian, the horse may be observed under saddle; therefore, we recommend bringing tack to the pre-purchase examination. Anyone who rides the horse will have to sign a waiver and must wear an ASTM-approved helmet.

**** Please place a check mark in the boxes below to indicate which services you would like performed at the pre-purchase examination.*

- Digital Radiographic Examination:** \$125 - \$2,000
Following the moving examination, the horse will proceed to Radiology. It is standard in our pre-purchase examinations to remove the horse's front shoes in order to obtain the best quality radiographs of the front feet. Exceptions will need to be discussed with the veterinarian performing the examination. We do not provide a farrier on the premises every day. Arrangements to have the shoes replaced will need to be made in advanced. More advanced diagnostics such as ultrasound may be indicated if swelling, thickening or sensitivity of the tendons or ligaments is palpated. A standard set of pre-purchase radiographs requires 24-32 views including: front feet/navicular, all four fetlocks, both hocks, and both stifles. More radiographs, such as neck, carpi and splint bones, may be indicated depending on the clinical and moving evaluation. A copy of the radiographs can be provided upon request on a CD format. All shipping charges will be at the buyer's expense.
***If a full set of radiographs accompany the horse and will be used instead of radiographs performed at our clinic, there is a \$300 radiographic consultation fee.*
- CBC:** \$80.50
A complete blood count (CBC w/ Fibrinogen) will be taken which is one of the most common blood tests performed to help diagnose various infections or other abnormal conditions of the body.
- Coggins (EIA):** \$51.25
- Chemistry (Blood Work):** \$98
A blood chemistry panel provides additional information concerning muscle enzymes, kidney, liver, and other organ function.
- Drug Screen** (depending on the level of testing): (\$232.70-280)
The drug screen blood work is sent out to a lab; therefore, results are often not available for at least 5-7 working days. We do not recommend storing serum for drug screens to be performed at a later date, as the testable medications may deteriorate in the sample and not provide accurate results.
- EKG:** \$220
Provides information about the electrical activity of the heart, and is used as a diagnostic aid for cardiovascular problems.
- Video Endoscopy:** \$248
Provides direct visual examination of the upper respiratory tract and helps enable diagnosis of such conditions as of such conditions as laryngeal hemiplegia, aryepiglottic entrapment, pharyngeal cysts, and lymphoid hyperplasia.
- Health Certificate**
(for horse leaving out of state): \$57.50

LETTER TO CLIENT 2017

Dear Client,

We have been asked to do a purchase examination where both the buyer and the seller are people we work for. This puts the veterinarian in a difficult situation. The seller must understand the veterinarian is always working for the buyer, and that we must disclose all findings, even if it is to the seller's disadvantage. We would rather not enter into this situation if it means we could lose a client.

The seller releases all past medical records to the buyer. The buyer allows complete access of the examination and further testing to the seller. We ask that the seller and buyer sign this letter in order to ensure both parties understand our stipulation.
